

EXPLORE! THE WORLD AROUND YOU

NURSERY OBSERVATION DAY

On the 14th and 15th October, 2024 our Pre-Primary Nursery students embarked on an Exciting Observation Day exploring four interactive corners designed to spark curiosity, learning and creativity.

The 4 Corners consisted of:

Kitchen Corner: Our Little chefs explored an attractive kitchen setup where they engaged in Active play and learning. This hands-on experience introduced them to fine motor skills, and teamwork.

Market Corner: Our young entrepreneurs learned about exchanging play money for goods and services. This interactive setup developed social skills, numeracy, and decision-making. They thoroughly enjoyed purchasing goods from the market and engaged in role play.

Educational Corner: Our little curious minds engaged with puzzles, shapes, and colours and a comfortable reading corner, fostering problem-solving skills, spatial awareness, and cognitive development.

Tent Corner: Our curious adventurers discovered a cosy play corner exploring stories and imagination. This peaceful space nurtured language skills, creativity and imagination contributing to their social and emotional development.

The Nursery Observation Day was a resounding success offering a unique opportunity for our Young learners to explore, discover and grow. This experience encouraged their creativity, self expression and provided a hands-on experience. The observation day was an incredible experience for every child and was truly overwhelming to observe their engagement and enthusiasm. We look forward to creating such fun learning experiences for our students in the future.
